

Series4000

Real Asset Management International (RAMI) has maintained its position as a market leader by continually offering a range of products and services that provide organizations with a complete fixed asset management solution. Each module has been specifically designed to meet the needs of clients on an individual basis. Our solutions address all US state and federal tax and accounting guidelines including GAAP, IAS17, IFRS and Sarbanes-Oxley. RAMI's continued success is based upon three key factors; first class products, proactive customer care and high caliber staff.

The integrated range of client/server and web-based modules within Series4000 cater to the requirements of multiple departments, allowing users access to a centralized database of all modules required.

Asset4000

A totally configurable depreciation and tax tool that controls and tracks changes to an asset throughout its life-cycle. Incorporates all 50 US state-specific tax rules.

Asset4000i

A true, web-based fixed asset management solution, ideal for any organization that requires remote access to its asset register from any Internet or Intranet terminal.

Lease4000

Provides complete control over finance and operating leases used to acquire assets and inventory items, as well as effectively managing domain name registration, website contracts and software support agreements.

Forecast4000

Uses existing asset information to run 'what-if' scenarios for future capital expenditure and asset disposals.

Project4000

A capital project control solution that gives users complete control of cash-flows, budgets and project expenses.

Document4000

An inexpensive solution for managing all documents associated with assets, inventory items, leases and capital projects, such as purchase orders, invoices and contracts.

Inventory4000

Provides the facility to store detailed information against inventory and stock items, including location, analysis codes and descriptions.

Track4000

Enables assets and inventory items to be bar-coded and tracked for quick and accurate physical audits at a minimal cost.

RFID4000

Utilizes Radio Frequency Identification (RFID) tags to reconcile an entire area of fixed assets at once, immediately saving time, reducing effort and improving traceability.

Maintenance4000

A comprehensive, functionally rich computerized maintenance management system that manages all planned, unplanned and preventative maintenance associated with fixed assets.

Help4000

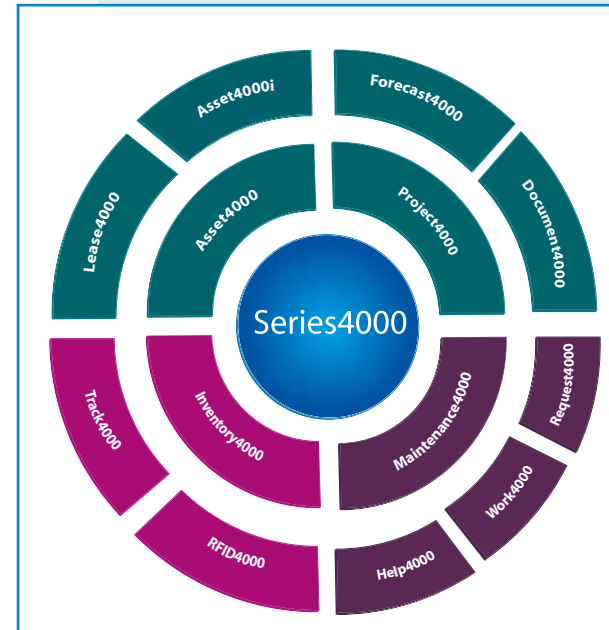

A centralized system for recording reports of problems with fixed assets, inventory and stock items.

Work4000

A mobile handheld maintenance tool allows engineers to view up-to-date works orders and stock information from any remote location.

Request4000

A web-based call logging facility, which integrates with Maintenance4000 to generate work orders and with Help4000 to generate helpdesk cases.

Some clients already benefiting from the Series4000 suite of solutions include:

AirBoss
Canadian National Institute for the Blind (CNIB)
Carmike Cinemas
LSG Sky Chefs
Semtech Corporation
Pliant Corporation
Princess Auto
Putnam City Schools
Quad Graphics
Winks Companies, LLC

Series4000 has the flexibility to meet the needs of any organization, whether a single-site or multi-national operation. All products are supported throughout the US and Canada by an experienced team of consultants.

RAMI is committed to keeping clients at the forefront of technological innovation. Its Series4000 products are truly scalable, capable of running under all modern operating systems and can integrate with all major proprietary databases.
